MARINE NEWS NO. 1 – Inspection and Intact Stability Evaluation for a Cable Laying Barge

Visual inspection onboard a Cable Laying Barge “K-LINK BRAVO” at Kantang Port, Trang Province in the South of Thailand was carried out by Navis Team on 7th Jul 23. The barge is being modified from a flat top barge to a cable laying barge with suitable accommodations, workshop, store, equipment and machinery. Navis Consult provides a re-calculation of intact stability indicators including new lightship weight, location of center of gravity at various conditions. A Stability Booklet was also provided.
